

FIG. 1

FIG. 2

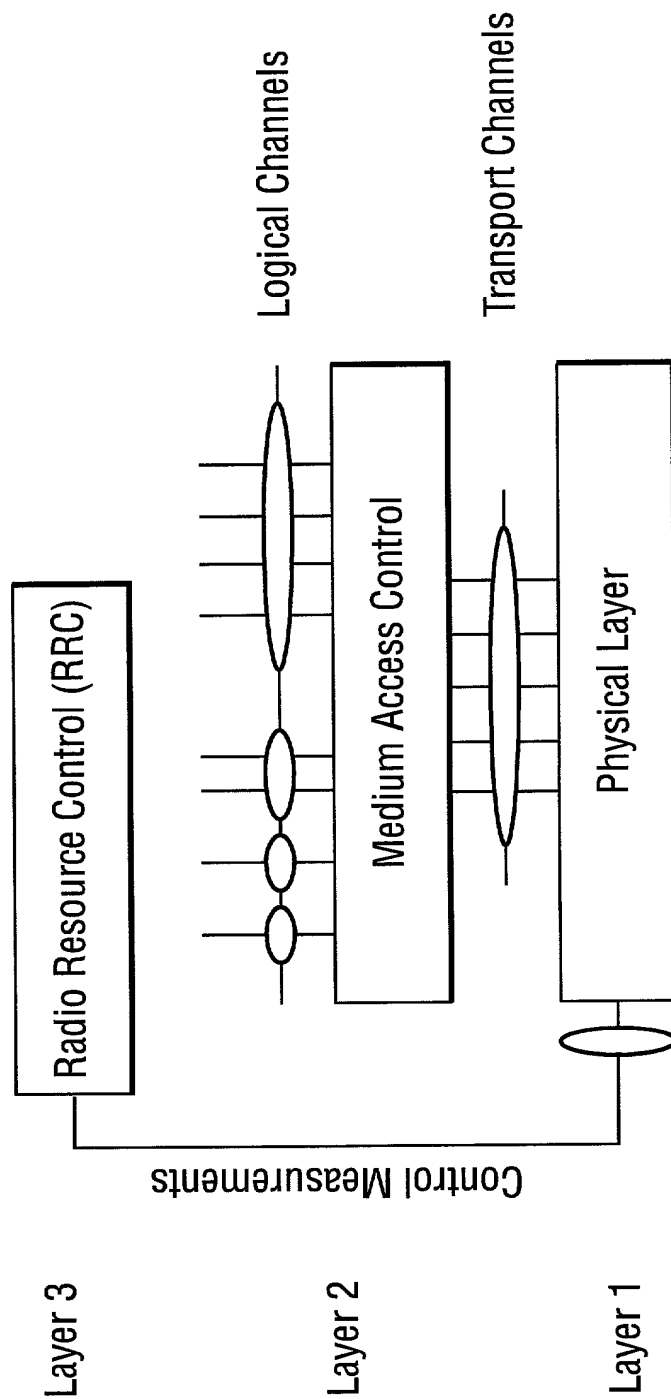

FIG. 3 GP denotes the guard period and CP the chip periods

Chip number (CN)	Length of field in chips	Contents of field
0-975	976	Data symbols
976-1487	512	Midamble
1488-2463	976	Data symbols
2464-2559	96	Guard period

FIG. 4

38

Definition	'RX Timing Deviation' is the time difference TRXdev = TTS - TRXpath in chips, with TRXpath: time of the reception in the Node B of the first significant uplink path to be used in the detection process TTS: time of the beginning of the respective slot according to the Node B internal timing
------------	--

FIG. 5

Maximum cell radius is limited by the guard period.

$$T_{guard} = 2\tau_{max}$$

$$T_{guard} = 25 \mu s \Rightarrow \tau_{max} = 12.5 \mu s \Rightarrow r_{max} = 3750 m$$

FIG. 7
